Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

Issued by **Oracle**

The Oracle Cloud Infrastructure (OCI) AI Foundations certification is designed to introduce learners to the fundamental concepts of artificial intelligence (AI) and machine learning (ML), with a specific focus on the practical application of these technologies within the Oracle Cloud Infrastructure. This course is ideal for beginners and provides an accessible entry point for those looking to enhance their understanding of AI and ML without the requirement of prior extensive technical experience.

Expiration Date: September 11, 2027

Skills

Strong foundational knowledge about the artificial intelligence and machine

Understand AI and ML Basics: Learn the foundational concepts of AI and

learning concepts, knowledge about the role of large language models along with the related OCI Services.

ML including the differences between artificial intelligence and machine learning and deep learning.

Explore Machine Learning and Deep Learning Fundamentals: Dive into the basics of machine learning with an emphasis on supervised and unsupervised learning techniques. Gain insights into deep learning, exploring convolutional and sequence models like CNNs and RNNs and LSTMs.

Get Started with OCI's AI Tools: Familiarize yourself with OCI's comprehensive AI tools portfolio.

Discover Generative AI and Language Models: Understand the capabilities and applications of generative AI models and language frameworks, learning how these tools can be utilized to automate and enhance a wide range of tasks.

OCI AI Solutions: Learn about OCI AI services,

OCI AI Solutions: Learn about OCI ML Services,

OCI AI Solutions: Learn about OCI Generative AI and Oracle 23ai including Oracle Select AI to address real-world business challenges.
